What services can you build?

eAuditor cloud® Multitenant is a platform for building your own IT subscription for end customers

IT monitoring as a Service

Monitoring of stations, servers, activity, alerts, and monthly reports

Compliance Reports

Reports for management, audit, GDPR, ISO, NIS2, or end-client compliance

Managed IT Administration

Cyclic administration and monitoring of the client environment

Remote Support

Remote user support and quick response to requests

IT Asset Management

Hardware, software, change, and compliance inventory

Security & DLP

USB control, locks, alerts, and data leak risk mitigation

Sample SME Partner Scenario

The company serves **300 client workstations** and provides IT outsourcing services on a **subscription basis**.

300 PC

Number of supported endpoints

19 USD

Average monthly PC fee

69 230 USD

Annual service revenue

④ The example is based on average market rates for SME services and IT outsourcing.

Platform Costs

Cost component	Assumptions	Annual value
Initial package Multitenant (150 PCs)	2 500 USD	2 500 USD
Additional 150 PCs DLP version	150 PC × 1,22 USD × 12 month	2 196 USD
Total platform cost		4 696 USD

Business Summary

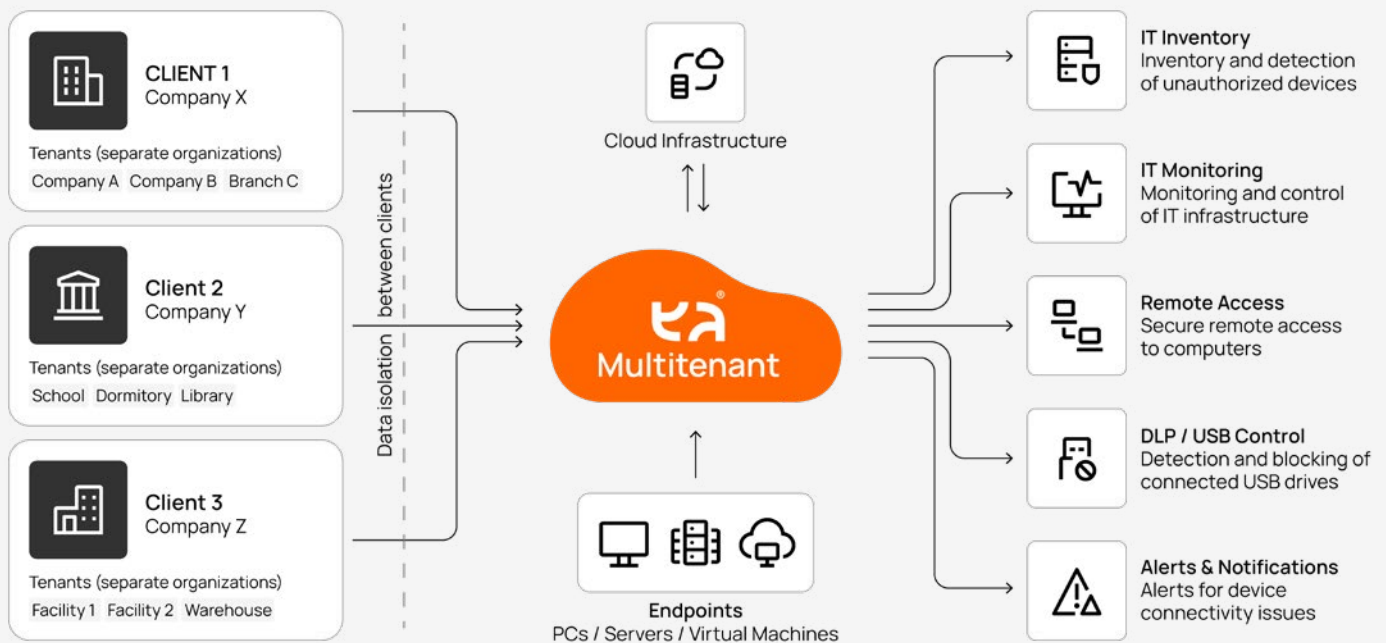

Item	Annual value
Annual service revenue	69 230 USD
Estimated service delivery cost*	-41 208 USD
Platform cost	-4 696 USD
Potential operating profit	23 326 USD

*Estimated service delivery cost (team, support, administration, etc.) – approximate value.

The above calculations are examples and do not constitute a commercial offer. Actual results may vary depending on individual terms of cooperation, cost structure, and the scale of services provided.

Security and platform architecture

Designed for companies that can't afford to compromise

The eAuditor cloud® Multitenant platform operates on a secure-by-design model. Each client benefits from a separate environment, with all operations controlled, logged, and secured at the infrastructure and application levels.

Data & Access Protection

- Data isolation between clients (full tenant separation)
- Encrypted communication (TLS 1.3)
- Access control and permission management
- Protection against brute-force attacks and abuse

Secure Architecture

- Data center located in Poland
- Compliance with ISO standards: 27001, 27017, 27018, 27701*
- SSL certificate with 4096-bit encryption for eAgent and eServer
- System update and version control

Control & Monitoring

- Event and activity logging
- Security alerts and anomaly detection
- Data Loss Prevention (DLP)
- Monitoring of endpoints and IT infrastructure

*Compliance and certifications are provided by the cloud infrastructure vendor (OVHcloud).

Why does it matter?

By combining a multitenant architecture with advanced security mechanisms, eAuditor cloud® enables you to deliver IT services to multiple clients without the risk of data leakage, loss of control, or scalability issues.
