Affiliate Program

Open yourself to innovation. **Earn with the best.**

BTC Sp. z o.o. has been successfully creating and delivering the most innovative solutions in the IT industry for over 20 years.

We were the first in Poland to create a comprehensive, fully web-based, and responsive IT infrastructure and security management system equipped with artificial intelligence, and integrated it with a professional DLP system.

We effectively respond to our clients' needs and constantly monitor technological developments, allowing us to offer the most modern and advanced systems on the market. We focus on solutions that are successfully used by clients in the public administration sector and commercial companies.

Products

eAuditor

A comprehensive solution for IT management, monitoring, inventory, and security. eAuditor software supports key organizational processes, saving IT departments time. It automates operations, enabling flexible and efficient development.

eAuditor IAM

Comprehensive software that automates the processes of granting, verifying, and revoking authorizations to IT systems. It effectively prevents personal data leaks and provides ongoing monitoring of all employee authorizations.

eAuditor DLP

A professional Data Loss Prevention (DLP) system that protects against unauthorized access and data loss. It offers 17 advanced security policies, ensuring comprehensive protection. It also allows access monitoring and data flow control.

eHelpDesk

A system for managing technical support processes. It enables the supervision of IT services and incident management to limit their negative impact on the organization's operations. Thanks to its web-based console, it allows for handling requests from any device.

RODOprotektor

A solution for managing personal data in compliance with the GDPR. It supports administrators and data protection officers in their daily tasks, enabling the management of documentation for multiple entities in a single system. It efficiently supports entities of varying sizes and organizational structures.
